THE PROFESSIONAL'S CHOICE

About UniBond

For over 60 years tradesmen have turned to UniBond for professional solutions. Established in Camberley in 1946, UniBond was originally known for PVA. But we've come a long way since those early days. The UniBond range now includes a broad range of products for both trade and DIY use including Grab Adhesives, Sealants, Tiling products, Tapes, Epoxies and Wood Glues. It is this long experience

which ensures that UniBond continues to offer quality products and solutions today.

And, as we continue to invest in the development of new products and formulas – Henkel's patented Flextec formula is a key component of some of our best selling products – you can be sure that there will always be a UniBond solution for your trade.

THE PROFESSIONAL'S CHOICE

PVA

PVA

UniBond has over fifty years' heritage in the PVA market and draws on all its experience to produce the only BBA accredited PVA on the market.

The UniBond formulas are perfect for interior and exterior universal bonding, priming, sealing and ideal as a plaster bonding aid.

With new colour-coded packaging it is now easier than ever to choose the right product for any need.
